

Innovative Designs+Detail Craftsmanship

Est. in 1991

ABOUT US

From fine custom cabinetry, countertops, hardware, plumbing, lighting and more, each project is designed specifically for each customer's lifestyle. Planning & Building, Inc. has helped build South Florida high end homes for decades. Established in 1991 by the husband-and-wife team Oscar and Cristina Urreiztieta, Planning & Building, Inc. has been built from the ground up inspired by innovative design, quality and vision.

Oscar grew up in Caracas, Venezuela, with a family filled with architects and engineers. Family meals would often turn to discussions of urban development designs, architecture, and structural engineer. This fostered Oscar's love of engineering. That love, combined with his passion for Polo, brought Oscar to Wellington-Florida, where he studied Mechanical Engineering and Contracting at FAU. While studying, and playing amateur polo, he helped his father's business, Key Ventures, Inc. develop much of the equestrian land that was still unclaimed in Wellington during the 1980's, 90's and 2000's.

Cristina's love of art and design was also family born. Cristina grew up in Cali, Colombia, in a family built on traditional values. Her family's lifestyle was built around agriculture and commerce; two traits that she carried with her when she cofounded the business. After graduating high school, Cristina moved to Paris to study French and Arts. During that time, she had the opportunity to work for a multinational company in France, which enabled her to study design, business and finance while traveling throughout Europe for over ten years. Cristina's family involvement and love for the equestrian sports brought her to visit South Florida, where she met Oscar. The two fell for each other, and shortly after getting married, cofounded Planning & Building, Inc.

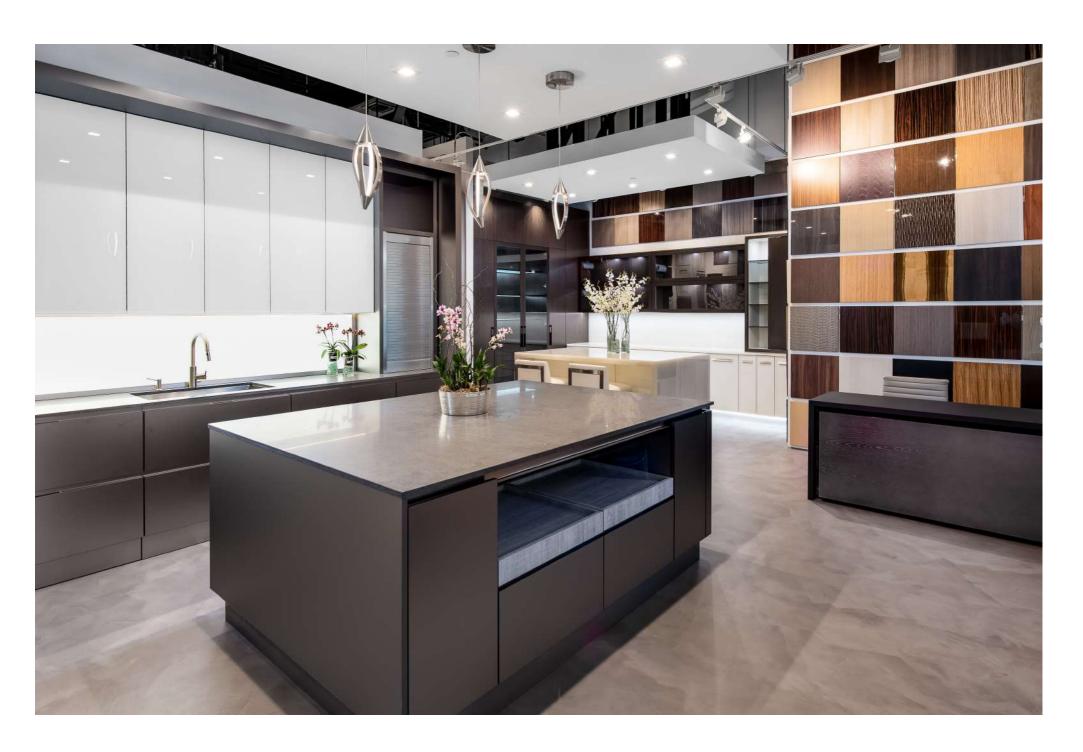

Originally founded as a general contracting company, the couple worked together building luxury homes in South Florida. Recognizing a business opportunity during the lag of the recession in the early 90's, they expanded their business to Colombia where they designed and installed fine custom cabinetry, plumbing, lighting and hardware fixtures for luxury high rises and homes. The business grew rapidly and they gained extensive experience collaborating with the best architects, builders, and designers in the country, working on more than two dozen of the finest buildings; amongst them being prestigious hotels like Marriot, Ritz Carlton, Intercontinental, Sheraton and more. In just two years their successes led Planning & Building, Inc. to become the exclusive distributor in the country for more than half a dozen prestigious brands, such as Kohler, Jacuzzi, Hansgrohe, Lutron, Elmwood, and more.

Consequently, their business continued to expand internationally, first to Venezuela, then Ecuador and the Caribbean. The couple found likeminded partners in Elmwood Fine Custom Cabinetry, a partner equally dedicated to Planning & Building, Inc.'s owns vision and drive for detail and quality. With their focus on using the best and most innovative materials, sustainability, and stewardship, the two companies have thrived, delivering the highest quality of custom cabinetry for over fifteen years. The combination of dedicated talented employees, a rigorous process and a mind for quality and perfection has brought hundreds of homes to life, in places such as the Palm Beach Island, Jupiter Island, Palm Beach Polo and Country Club, The Bears Club, Admiral Cove, Frenchman Creek, Old Palm, One Thousand Ocean, The Floridian, Breakers West and beyond.

This Book is a selection of some of the work of Planning & Building, Inc., in collaboration with Elmwood Fine Custom Cabinetry and some of the best architects, interior designers, contractors, and tradesman in South Florida.
